

CarHandled Toolkit

Lease Calculator — Premium Edition

Welcome to Your Lease Confidence Companion

This calculator was designed to help you estimate lease terms the way a dealer does — with clarity, transparency, and zero pressure.

WHAT IT HELPS YOU DO

- ✓ Calculate monthly lease payments with tax.
- ✓ Estimate drive-off amount and residuals.
- ✓ Factor in rebates, trade-ins, and fees.
- ✓ Compare scenarios with real numbers.

HOW TO USE

1. Open the **.xlsx file** in **Microsoft Excel** or upload to **Google Sheets** (File → Import) to edit in your browser.
2. Only edit cells highlighted in **gold/yellow** — all other cells are formula-protected and should not be changed.
3. Hover over or click column headers for built-in guidance on each field.
4. Adjust lease terms, taxes, and fees to simulate your specific scenario.

IMPORTANT NOTES

- Your data stays private — nothing is tracked or transmitted.
- The file is fully yours to keep and edit — no copy required.
- Estimates may vary based on dealer, state, or financing structure — always confirm final numbers in writing with your dealer.
