

CarHandled Toolkit

Lease vs Buy Comparison Worksheet

Simplifying the car buying journey — one smart decision at a time.

This worksheet is designed to help you clearly compare the total cost of leasing vs buying a vehicle over time. It is part of the CarHandled Buyer's Toolkit — created to help you outsmart the dealership and make confident choices.

WHAT THIS TOOL HELPS YOU DO

- ✓ Compare monthly payments, down payments, and long-term costs.
- ✓ Factor in lease-specific charges (wear & tear, turn-in fees).
- ✓ Understand hidden costs of ownership (maintenance, flexibility).
- ✓ Quickly see which option is more cost-effective for your situation.

HOW TO USE

1. Open the **.xlsx file** in **Microsoft Excel** or upload to **Google Sheets** (File → Import) to edit in your browser.
2. Enter your real numbers in the **Lease (Column C)** and **Buy (Column D)** sections — only cells highlighted in **gold/yellow** are editable.
3. The worksheet will automatically calculate your **Total Cost Over Term** and highlight the more cost-effective option.
4. Double-check lease details with your dealership — this tool gives an estimate, not a final quote.

IMPORTANT NOTES

- Key formula cells are locked to ensure accuracy — do not attempt to unlock them.
- Your data stays private — nothing is tracked or transmitted.
- Always verify numbers with a licensed financial or auto advisor before making any decisions.

PAIRS WELL WITH

File	Purpose
Lease Estimator.xlsx	Dealer-style lease payment calculator
Buy Estimator Premium.xlsx	Full purchase cost & payment estimator
Deal Comparison Sheet.xlsx	Side-by-side dealer quote comparison
CarHandled™ Toolkit (PDF)	Full buying guide, scripts & checklists
